

Job Description: Hiring for Multiple Developer Roles (Django, Web Sockets, React Native, Frontend)

Company Name: Anishree Technologies LLP, Nagpur

Location: Manish Nagar, Nagpur

Job Type: Full-time

Experience Required: Minimum 1-2 years (Production-Level Experience Preferred), Fresher Can also apply

Open Positions:

1. Backend Developer - Django (2 Positions)

Responsibilities:

- Develop and maintain scalable backend applications using Django.
- Work on RESTful API development, authentication, and database optimization.
- Integrate third-party APIs and external services.
- Ensure high performance and responsiveness of applications.
- Debug and resolve technical issues in production.

Requirements:

- Strong knowledge of Python and Django framework.
- Experience with Django ORM, DRF (Django Rest Framework), and authentication methods (JWT, OAuth, etc.).
- Hands-on experience with PostgreSQL or MySQL.
- Knowledge of caching techniques (Redis, Memcached) and background task processing (Celery).
- Familiarity with Git and CI/CD pipelines.
- Understanding of deployment processes (Docker, AWS, Digital Ocean, or PythonAnywhere).
- Experience in real-world production applications is a must.

Preferred Experience:

- Worked on an e-commerce, SaaS, or on-demand delivery system.
 - Implemented role-based access control in Django.
 - Experience in Web Sockets is a plus.
-

2. Web Sockets Developer - Django Channels (2 Positions)

Responsibilities:

- Implement real-time features using Django Channels and Web Sockets.
- Build scalable and high-performance real-time applications.
- Work on chat systems, live notifications, and tracking features.
- Debug and optimize WebSocket connections for efficiency.

Requirements:

- Strong understanding of Django Channels and Web Sockets.
- Experience in building real-time applications (e.g., chat, live tracking, notifications).
- Familiarity with Redis and Celery for async task handling.
- Proficient in working with PostgreSQL and database optimization.
- Hands-on experience with authentication in WebSocket connections.
- Knowledge of load balancing and scaling WebSocket connections.

Preferred Experience:

- Developed a chat application or live tracking system using Web Sockets.
 - Worked on a high-traffic application requiring real-time communication.
-

3. React Native Developer - Mobile Applications (2 Positions)

Responsibilities:

- Develop cross-platform mobile applications using React Native.
- Work on API integrations, UI/UX enhancements, and performance optimizations.
- Debug and resolve app crashes, memory leaks, and performance issues.
- Implement push notifications and deep linking.

Requirements:

- Strong understanding of React Native fundamentals.
- Experience with React Navigation, Redux, and Context API.
- Hands-on experience integrating RESTful APIs.
- Proficiency in handling third-party libraries and native modules.
- Experience in deploying apps on Google Play Store and Apple App Store.
- Knowledge of Firebase (authentication, Fire store, FCM, etc.) is a plus.

Preferred Experience:

- Built and deployed at least one production-level React Native app.
 - Worked on real-time features (Web Sockets, push notifications, etc.).
-

4. Frontend Developer - React.js (1 Position)

Responsibilities:

- Develop interactive and responsive UI using React.js.
- Implement frontend logic and integrate with backend APIs.
- Optimize performance and ensure high-speed rendering.
- Work on reusable components and state management (Redux/Context API).
- Collaborate with designers and backend developers for seamless UI/UX.

Requirements:

- Strong knowledge of React.js and modern JavaScript (ES6+).
- Experience with state management (Redux, Context API).
- Hands-on experience in building and deploying production-level React applications.
- Proficiency in working with RESTful APIs and Web Sockets.
- Experience in handling authentication (JWT, OAuth, Firebase Auth, etc.).
- Familiarity with UI frameworks like Material UI, Tailwind CSS, or Bootstrap.
- Understanding of SSR (Next.js) is a plus.

Preferred Experience:

- Built a SaaS platform or e-commerce frontend using React.js.
- Experience with performance optimization and code splitting.
- Worked on real-time dashboards or admin panels.

General Requirements for All Roles:

- Strong problem-solving and debugging skills.
- Ability to work in a fast-paced, team-oriented environment.
- Good communication skills and ability to understand project requirements.
- Experience in handling production issues and optimizing performance.
- Familiarity with Git, Agile methodology, and CI/CD workflows.

Perks & Benefits:

- Salary Package 1.8 LPA to 2.4 LPA
 - Joining Immediate
 - Work on exciting real-world projects.
 - Flexible work environment and growth opportunities.
 - Learning and skill development programs.
-
